

# ALUCLAD COLOURS

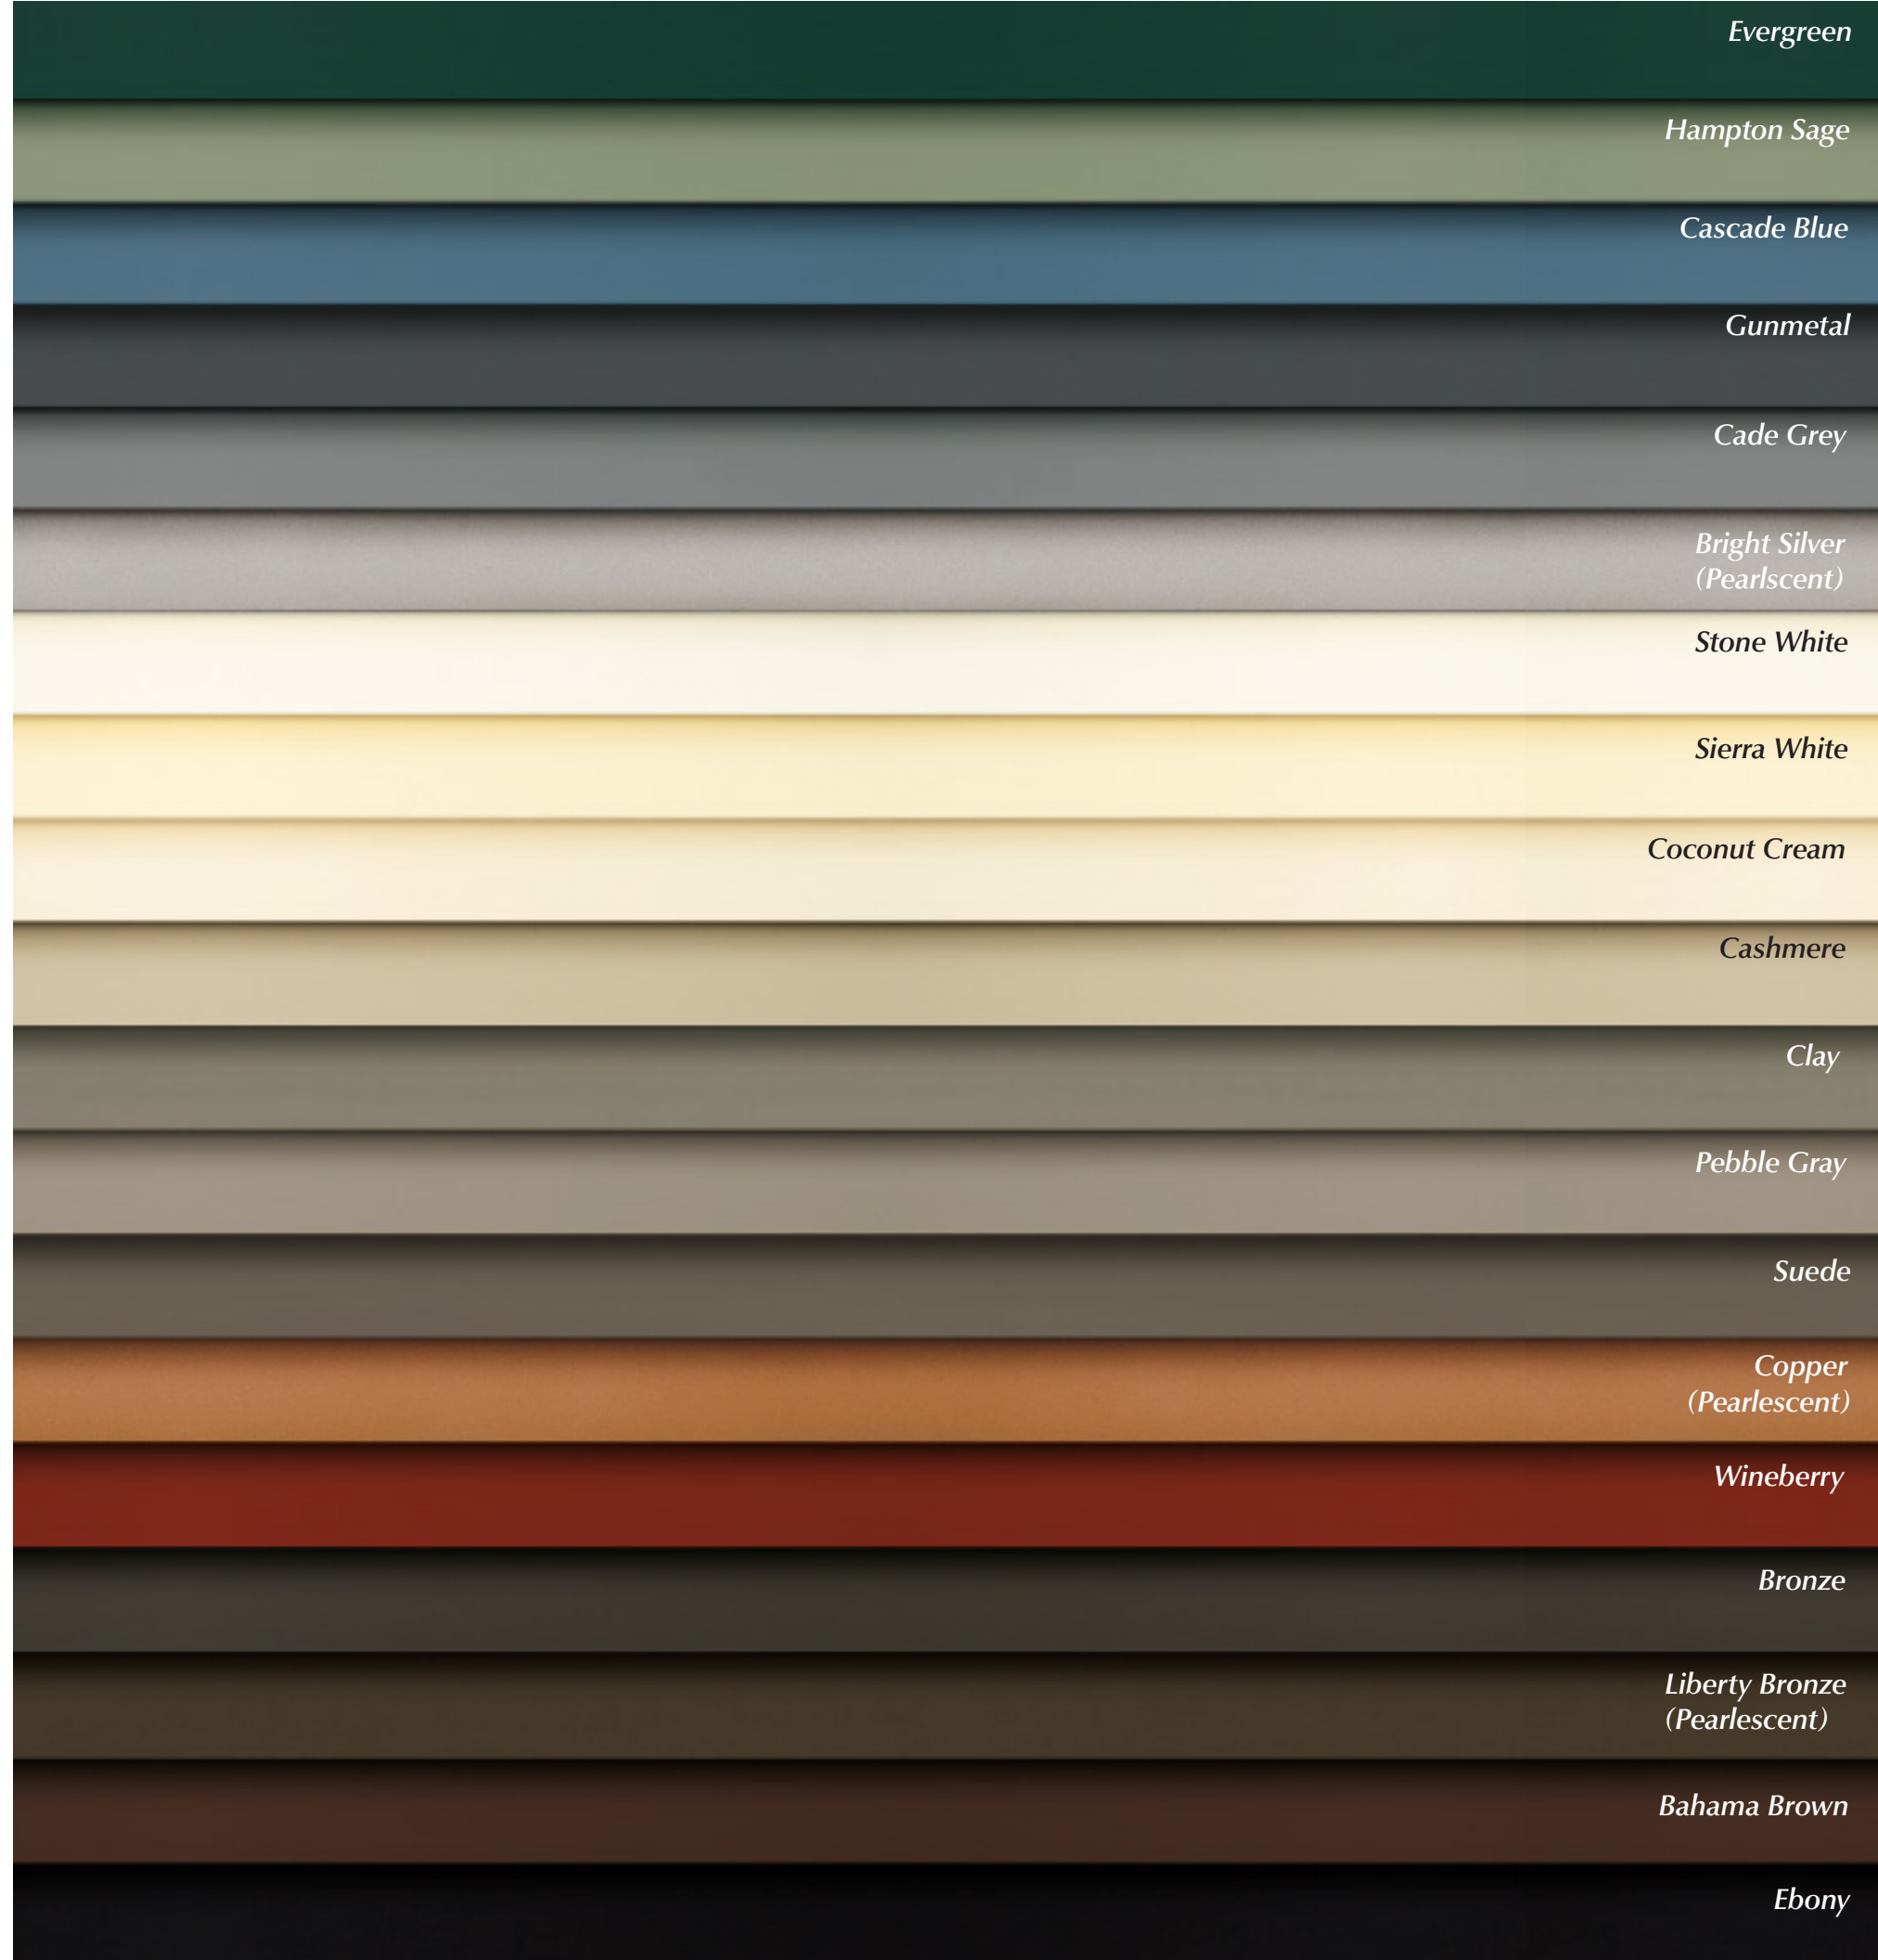

DISCOVER A WIDE VARIETY OF BEAUTIFUL OPTIONS

Deep, rich and lasting are words that describe the difference of Marvin® colour. From subtle earth tones to bold, attention-grabbing hues, to brilliant pearlescent tones, our cladding stands out as much for its beauty as it does for its legendary durability.

Marvin's low-maintenance, aluclad wood products feature an extruded aluminium exterior, finished in commercial-grade paint for superior resistance to fading and chalking. Finish strong with longer lasting colour, backed by a 10 year warranty.

## AAMA 2605: THE HIGHEST INDUSTRY STANDARD

Not all AAMA 2605 finishes are created equal. The industry standard now allows the 2605 rating for roll-form (coil) aluminum. But there's a difference. Our substantially stronger, impact resistant extruded aluminium material — standard on all our cladding components — is about the thickness of a pound coin. Roll-form aluminum, used by some window manufacturers for components, is almost as thin as a soda can.
