Screens

Wood Screen Surround with Aluminum Surround

Creates a seamless wood interior

Screen mesh comes masked to allow no-mess staining or painting of the wood surround

Patented

Retractable Screen

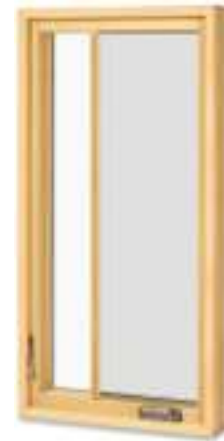

The innovative Retractable Screen from Marvin® Windows and Doors makes the most of the Casement and Awning windows providing a screen that lets the breeze in and easily retracts out of sight to offer enjoyable scenery. A tight seal, a strong adjustable pull bar and hidden magnetic locking system ensure extraordinary performance and superior looks. Marvin's unique concealed design makes the screen nearly undetectable when the screen is in the retracted position. No more replacing screens with the seasons again.

Universal Design – easy to reach, easy to operate by pulling the screen from side to side for casement windows or pull the screen from top to bottom on awning windows

Concealed system seamlessly blends in, without intruding into daylight opening

Retro-fit capability allows simple conversion of existing unit (Ultimate Casements and Ultimate Awnings)

Installation friendly system – easy to remove, clean, paint or stain

**Retractable Screen
in closed position**

When screen is in the closed position, the retractable screen is virtually undetectable

**Retractable Screen
easy operation**

When screen is needed, simply glide the retractable screen across window to put in place

**Retractable Screen
Fully Retracted (open)**

When side open views are preferred, the retractable screen effortlessly integrates into window jamb
